

Partnering with us:

HEALTH INSURANCE COMPANIES

Why Movement Health is looking to collaborate with health insurance companies in multiple countries.

At Movement Health, we recognise that partnerships and collaboration are crucial if we want to transform global healthcare systems. Moreover, these partnerships need to extend to all sectors of the economy, including:

- Health insurance.
- IT strategy consulting.
- Global banking and financial services.
- Genetic variation and biological function.
- Transport and logistics.

All of these sectors and industries have moved with the times, introducing changes that have allowed them to stay competitive and relevant. By contrast, the healthcare sector has lagged behind and is struggling to cope with demand, which is only going to increase in the future. That's why it's so important for healthcare to tap into other industries and learn from their innovation, knowledge and efficiency.

Here's why health insurance companies are so central to our thinking.

How you could help us

Movement Health recognises the value of health insurance companies' expertise in utilising large data to identify risk factors and develop policies to mitigate them. And we understand the importance of health insurance in facilitating access to healthcare systems and improving the lives of individuals.

Our focus is on enhancing both early treatment and prevention efforts, and we believe that building partnerships between public and personalised healthcare is crucial. With changes in the population's health profile and an ageing population, healthcare systems face enormous challenges, and health insurance plays a vital role in distributing the financial burden of healthcare among the population.

How you will benefit

Movement Health offers your company the chance to shape the future of health systems and collaborate with influential health experts across the 17 countries where we operate. As a health insurance company, you can play a vital role in designing policies to manage and reduce risk in these countries.

We are currently working with providers in 17 countries. We have established partnerships with over 180 leading experts from prestigious institutions, such as the national Ministries of Health and Harvard, in order to facilitate valuable collaborations and knowledge-sharing opportunities.
